The first 500 bibs of the DoloMyths Run Skyrace sold out in a few hours

Also in 2020 the race to get a bib for the DMSR Skyrace has finished really quickly. In fact, it has taken less than ten hours to organizers to have all the 500 bib numbers assigned, at least as far as the first tranche of bibs is concerned.

Many are the trail runners who want to take part to this iconic race with a limited number of participants where only the fastest ones to register online could succeed in getting a bib. Therefore another chance to take part to the DMSR Skyrace, one of the prestigious Golden Trail World Series 2020, will be given on February 14 at 12,00 pm, with other 300 bibs reserved to online entries.

«We are very satisfied with the results obtained in these first days of registrations. - says the president Diego Salvador on behalf of the whole Organizing Committee - We hope that athletes can appreciate the news of having all the races concentrated in the same week-end for the first time. As always, we will do our best to create a three-day event of great impact».

Still open the entries to the other two races, the DMSR VK scheduled on Friday July 17, and the DMSR Sellaronda Ultra Trail, on Saturday July 18, all around the Sella massif with over 60 km of total length and over 3,000 m of altitude difference (over 35 km fot its Half version).

Direct links to online entries and information about races and entry fees are available in the official website www.dolomythsrun.it.
